PRODUCTS:

Montgomery Trucking strings hundreds of miles of large diameter pipeline projects per year for various pipeline companies and or contractors. Additional services include unloading and stockpiling for pipeline companies and steel mills at remote storage areas before the pipeline construction begins. Montgomery Trucking also performs hauling and stringing for most of the pipe suppliers nationally. This segment of the business is primarily small diameter pipeline projects and is generally conducted out of the coating plants to small gathering and distribution sites.

The core business for Montgomery Trucking consists of loading, unloading, hauling and stringing pipe in 60' and 80' lengths. Montgomery Trucking has a fleet of steerable pole trailers that enable the long loads to be transported into storage yards and pipeline right of ways around the country. The specialized hauling is performed by a group of very experienced drivers. Almost all the drivers that work full time for the company have more than 10 years experience and the larger percentage have tenure exceeding 20 years.

JUSTIN MORTIMER - President/CEO
JIM PARKER - Senior Applications Engineer
JAN LEISNER - Assistant Sales Manager

PLANT LOCATIONS:

Milwaukee, Wisconsin

PRODUCTS:

Radyne designs and manufactures a comprehensive range of Line Pipe Heating Systems. These are available in many standard sizes for induction heating of all size of line pipe diameters. Radyne systems are designed for ease of mobility within the pipe mill. Integral wheels fitted to the base of each induction coil enable quick and easy movement from one line to the next; heavy duty jacks allow simple, efficient, and precise vertical positioning; lifting eyes fitted to the top of each coil similarly facilitate lifting via crane enabling quick and easy positioning onto the pipe coating line; and, they are designed to provide a highly efficient means of surface drying prior to coating.

Radyne Advanced Technology Tools Deliver Superior Results - The Radyne engineering team employs Inductotherm Group proprietary computer aided coil design and temperature modeling to provide rapid and accurate solutions. Radyne applications engineers utilize this modeling technology to rapidly determine the operating performance, physical dimensions, and number of induction heating coils required to pre-heat a range of API pipe sizes prior to coating.

BILL SOLOMON - President
RANDY HAYES - Sales and Marketing Manager (randyh@vacuworx.com)
RAY PLANK - Purchasing Manager

PLANT LOCATIONS:

Tulsa, Oklahoma - USA

PRODUCTS:

Vacuworx Global is the leader in manufacturing in-field vacuum lifting equipment. Vacuworx manufactures, sells, leases, rents, and services vacuum lifting systems for the energy, construction, infrastructure, and utility industries. Vacuworx Lifting Systems handle all forms of pipe, plate, and slabs including steel, plastic, concrete and cast-iron pipe, steel plate, steel piling, pre-cast slabs, and concrete road barriers.

The Vacuworx Advantage is based on three key elements: unique product design, top-quality fabrication, and 24-hour sales and service 365 days a year. Our lifters improve safety, reduce the number of ground personnel needed, lower payroll and insurance costs, and increase productivity by 7 to 12 times.

Vacuworx Global is privately held as Vaculift, Inc. and operates out of its main headquarters in Tulsa, Oklahoma, USA. The Vacuworx System has an excellent reputation around the world and is regarded as one of the best new innovations in the oil and gas industry in the past 20 years. For more information, contact Vacuworx at 1-918-259-3050 or visit our website at www.vacuworx.com for complete product details and video demonstrations.
